OBJECTIVE

I am a fresh graduate of Information System, passionate about building modern and easy-to-use web applications. I am looking for an internship opportunity to enhance my creative web development skills, combining UI/UX design and functionality. My goal is to become a professional web developer, bringing real value and contributing to product thinking, performance and usability.

TECHNICAL SKILLS

UI/UX interface building skills with ReactJs, Tailwind CSS, Material UI

Functional analysis and API calling skills with Redux Toolkit, Context API

Skills in using tools with VSCode, PostMan, ChatGPT, Cursor AI, Claude AI

EDUCATION

Bachelor's Degree in Information Systems   **2020 - 2024**

Nong Lam University, Ho Chi Minh City

GPA: 3.2/4

PROJECTS (https://portfolio-pdang.netlify.app/)

Zalando Application   **01/2025 - 05/2025**

Frontend Developer

- Built a responsive e-commerce web app using ReactJS, TailwindCSS, and Redux Toolkit
- Implemented global state management with Redux & RTK Query for CRUD operations
- Integrated JWT for user authentication and authorization
- Applied React Hook Form for form validation and data submission
- Optimized performance using lazy loading, Redux Persist, and component-level memoization
- Integrated an AI chatbot for product recommendations and order support
- Ensured cross-browser compatibility with Babel

Demo: https://shoppe-app-phi.vercel.app/

We Connect Application   **06/2024 - 12/2024**

FullStack Developer

1) Frontend
- Developed a role-based learning platform (Super Admin, Admin, User)
- Managed course operations and user permissions using Redux Toolkit
- Integrated JWT for secure login and authorization
- Built reusable components, optimized form handling, and supported responsive design
- Used RTK Query for API interaction and Redux Persist for state persistence
- Wrote unit tests to verify key features and user ows

2) Backend
- Uses Node.js and Express.js to build the REST API, with MongoDB and Mongoose for the database. bcrypt and jsonwebtoken (JWT) are used for security and user authentication, while CORS supports cross-domain data sharing
- The payment system integrates @payos/node and multer handles file uploads. nodemailer sends authentication emails and password recovery.
- Follows the MVC pattern, using Models such as User, Course, Payment, and Progress, with clearly organized Controllers and Routes. Middleware is used for authentication, authorization, and file handling.

Github Backend: https://github.com/PhamDang2002/elerning-server

Movie Application   **01/2024 - 05/2024**

Frontend Developer

- Created a movie streaming interface using ReactJS and TailwindCSS
- Fetched data from API using Fetch API
- Applied React Router for smooth multi-page navigation
- Practiced responsive design and structured code into reusable components

Version control and bug tracking skills with Babel, Unit Testing

💡 **ADDITIONAL INFORMATION**

- Can work full time, no salary required.
- Can work in Ho Chi Minh City, Binh Duong
- Possess personal laptop for development

✏️ **Knowledge**

- HTML5, CSS3, JavaScript (ES6+), TypeScript.
- ReactJS, Redux Toolkit, TailwindCSS.
- Redux, Context API, RTK Query, React Hook Form, React Router.
- RESTful APIs, JWT Authentication, Babel, Lazy Loading, Redux Persist.
- Chrome DevTools, useMemo, useCallback, code-splitting, VSCode.
- Postman, Git & GitHub, Figma (View only).
- AI used: ChatGPT, Cursor AI, Claude AI, Github Copilot
